About the Company

As **Zenith**, with over 60 years of trusted experience, we are a dynamic solution creator that offers high quality to our customers as a standard with our modern and advanced production technologies, our knowledge in the European market, our extensive field experience, and our global presence.

We offer our customers standard shelving systems, custom store organization solutions, case model lines, heavy-duty warehouse shelving, and refrigeration systems focused on the highest efficiency level.

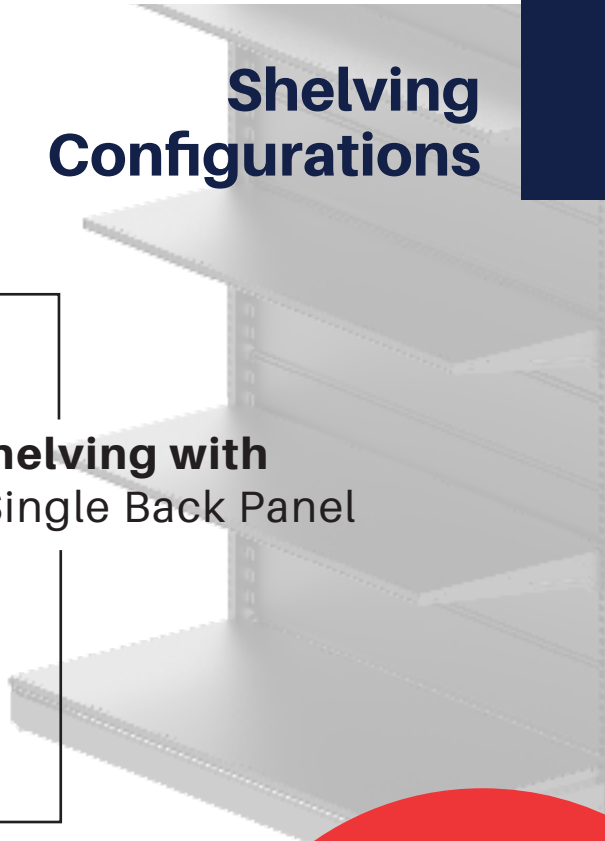

At Zenith, we help increase the competitiveness and efficiency of businesses by offering products produced with the latest technology to improve store areas. In cooperation with our customers, we create the future of retail with the strength we draw from the past.

Shelving Configurations

**Wall shelving with
UN/Q Single Back Panel**

**Wall minirack shelving
with Double Back Panel**

A black metal shelf system is shown on the left side of the page, with several shelves extending from a vertical support. The shelves are empty and have a perforated edge.
